

Leg Lifter

The electric powered leg lifter assists the user in getting their legs up onto the bed with the minimum of effort, it has been developed to be used with our electric adjustable beds as you can have the head section raised whilst lifting the legs to stop you falling back and is perfect for people with chronic oedema, muscle problems, hip and knee joint problems it does not get any easier than this for getting your legs up onto your bed. **Beat that.**

This price includes delivery & set up by trained engineers only when purchased with our beds.

€895.00
