

4ft Carers Lifting Frame

The 4ft carers bed vertical lifting mechanism is an ideal Carers bed for someone looking for extra space to turn in. The 4ft Carers bed has separate motors to profile the bed at the head-end or the foot-end and again separate motors to vertically raise the bed up to 18 inches from the starting position (standard 23 inches see below). Our new 4ft Carers bed can be raised flat for the carers to wash or turn their patient, or it can be used to help the patient stand out of the bed like a riser recliner chair, you must be sat on the edge (in the middle section of the bed) or it can be raised whilst adjusted at the head and foot-end to get a comfortable high position to look out of the window.

The 4ft vertical lifting frame can be put into any of our adjustable bed surrounds, so choose the bed you like (from the home page and add the cost of this double vertical lifting frame to the cost of any bed (from dropdown mechanisms tab (7th tab down) on any bed page) to get the combination you want.

The minimum starting height can be 21 inches from the floor to top of the mattress, the standard starting height is 23 inches. (please see height adjustments below, under accessories).

Description

- â€¢ 5 part adjustable profiling with integral raise and lower facility
- â€¢ 4 motors (2 for profiling and 2 for lift)
- â€¢ Vertical rise up to 18 inches from starting point
- â€¢ Twin On-Line fittings
- â€¢ Weight adjuster zone lumber section
- â€¢ Centre belt
- â€¢ Load bearing points bolted and sleeved
- â€¢ **Special order**

Dual beds have independant controls and independant mattresses. You will generally have a vertical lifting mechanism on one side of a dual bed, so if you are purchasing a 5ft dual bed you will only need one 2ft 6 vertical lifting mechanism.

Double beds have one mattresses, and above 4ft in size have two vertical lifting mechanisms and a special linking cable
